

BLUEY

MAKE YOUR OWN POM POM

*** THIS CRAFT INVOLVES SCISSORS AND GLUE. SO ASK AN ADULT FOR HELP WHEN YOU GET TO THESE STEPS.**
STEP 9

Now take your scissors and cut the top pieces of felt into ear shapes, and the bottom pieces of felt into feet shapes.

STEP 10

With the leftover bits of white felt that you cut off for the ears or feet, glue these strips on opposite sides to make the arms. You might need an adult's help to glue these strips in as far as you can, and get them into the pom pom. Wait for the glue to fully dry and cut the end of the felt strips into hand shapes.

STEP 11

Take a black marker and draw two large ovals on your white felt to make the eye shape and then cut them out. On the black felt, draw two smaller circles for the pupils and a small oval for the nose and cut these out. Next cut out two small triangles and a smile from your pink felt to create the mouth and inner ears.

STEP 12

Part the strands of wool and flatten out one side of your pop pom to create a flattish surface. Now glue all your felt pieces to the pom pom to create a face like pictured. And now you have your very own Pom Pom!
