

# BINGO

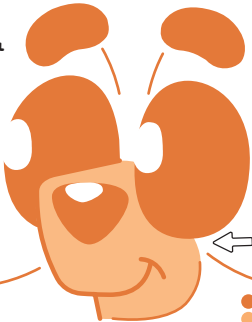

## PUMPKIN STENCIL

Make sure an adult helps you, it's tricky!

1. Clean out the pumpkin, scraping the flesh inside where you'll carve the design.

2. Print out the attached image to match the size of your pumpkin. A4 should be about the right size for a normal pumpkin.

3. Attach this stencil to the pumpkin with tape.

4. Carefully use a pin to make closely spaced pin pricks along all of the outlines, piercing the paper.

5. Use a thin craft knife to carve the pattern, cutting completely through the **dark orange** sections - be extra careful with this step!

6. Simply peel away skin within the **lighter orange** colour to enhance features.

- CARVE OUT
- SCRAPE BACK
